

## American state see different uses for extra fuel allotments

Washington (AP) — The government reported today that in the closing three months of 1973 was even an earlier estimates, rising at an annual rate of 2.8 percent.

was the worst rate of inflation in 22 years — since the percent increase in the first quarter of 1951. The government also reported that real growth of the economy in the fourth quarter of 1973 was 1.6 percent, an improvement over the preliminary estimate of 1.3 percent. Figures were contained in the Commerce Department's report on the Gross National Product (GNP), a measure of the total output of goods and services in the last year.

revised report said that for all of 1973, real economic was 5.9 percent and inflationary growth was 5.4 percent. Last month's preliminary report had placed real growth at 6.1 percent but it estimated inflationary growth at 5.3 percent. Preliminary report had estimated the inflation rate in the fourth quarter at 7.9 percent but this was revised in today's report to the whopping 8.8 percent. The rate was seven percent in the third quarter.

Nixon administration is projecting a 7.7 percent rate for 1974, with a high rate in the first part of a lower rate in the second half.

Commerce Department said the overall GNP, a both real and inflationary growth, rose \$33 billion annually adjusted annual rate of \$1,337.5 billion in the last year.

The major reasons for the revisions in the GNP was an increase of \$4.8 billion in net exports and a rise of \$2.1 billion in inventory investment, over the year figures.

also indicated that Americans were saving more money in the fourth quarter, with after-tax income increasing \$26.7 billion and personal only \$10.7 billion.

er economic developments Wednesday: Cost of Living Council lifted wage and price controls to \$6.5 billion in steel foundry industry.

Nixon director John T. Dunlop said the council would add any additional price increases on 1974 models of the auto makers.

Secretary George P. Shultz told a congressional committee that the dollar would remain strong and perhaps value this year. He said the energy crisis should impact on the United States than other countries.

Commerce Department's report on the GNP showed savings rate of Americans was up sharply in the final of 1973, to 7.3 percent of spendable income, an on that people are worrying more about the savings rate usually goes up in a recession or in and usually indicates some caution," said a Department spokesman.

more in times of economic slowdown, he said, is of losing jobs.

inations tomorrow student candidates

ONNE STACEY Staff Writer

inations meeting in the afternoon, the offices will be at 5 p.m. in 321 students who are candidates of the election, said the committee, said that those who have not immediately after Friday's meeting, said Ryskamp, and will follow the rules outlined in the elections rules which he said he will not apply to the nominations meeting.

me Court Bug' use broadened

INGTON (AP) — The Supreme Court approved the use of the writ of habeas corpus in the closing three months of 1973 was even an earlier estimates, rising at an annual rate of 2.8 percent.

3 decision said the Federal Bureau of Investigation (FBI) requires that warrants name persons only when the person has a probable cause to believe he is involved in a crime.

3, a writ may lawfully be a telephone over which it is an offense, the court said. The court refused to issue a writ on evidence gathered by the FBI in the case of a warrant authorizing the tap of the suspect and "persons as well as the suspect."

ations the court: unanimously that either party in discrimination suit filed under the Civil Rights Act could demand a trial by jury. Civil rights

## No fuss over gas in Utah

Utah drivers will have no problem getting gasoline, according to a statement from the governor's office.

Cliff Collings, spokesman for the division announced that the state has been allocated 72 percent of last year's gas consumption total, reported Mrs. Dolly Young, assistant to Congressman C. Dan McRae.

Utah drivers haven't experienced too much problem with the decreased amount, because they have voluntarily reduced the consumption of gasoline by 20 percent, Gov. Calvin L. Ramsey said Wednesday at his monthly televised news conference on KUED.

There have been spot shortages, Ramsey said, "and I hope nothing Mr. Simon does creates one."

Ramsey said the he and other governors want to know the formula by which state allocations are made.

"We have trouble getting any information out of Mr. Simon," the Democrat said. "I have trouble understanding what he's contemplating."

Ramsey said he favors a reduction in the price of crude oil to \$6-7 a barrel.

The president of Gulf Oil Co. has predicted gas will be 75 cents a gallon by this summer. The governor said that's a good assessment of the price of crude oil is rolled back.

As for gas allocations in the state, "it will be the businesses that will suffer, but hopefully only temporarily," Mrs. Young said.

Several areas which have had an "influx of business and people" are suffering, but an "influx of business and people" is determining if additional fuel supplies can be sent to them.

Under the new Simon order 19 states were given an increase in their February gas supplies. Ten states received a five percent addition, while nine others were granted a two percent increase.

projects will be placed on the sidewalk between the Lee Library and the McKay Building.

The purpose of the quad projects, according to Ryskamp, is to "involve more students in the elections." It will also give candidates a chance to voice their views and it will publicize the elections, he added.

In the event that one of the candidates is involved in a questionable campaign activity, the problem will be brought before the Attorney General S. Derrin Watson, who will review it and possibly bring it before the violations committee.

The committee, continued Ryskamp, will then decide the action to be taken if the person is in fact in violation of election laws. Ryskamp said the violation would have to be of a serious nature before the committee would take action, including spending more than the financial limit during the campaign, dishonesty, violation of standards or campaigning on Sunday, said Ryskamp.

Also scheduled for Friday's meeting will be the drawing for spaces assigning Quad Projects to be held during the primary elections March 7 and 8. The quad projects will consist of booths set up by the candidates in the spaces for which they draw at the nominations meeting. The

lawyers expressed fear that juries would be less likely to render fair verdicts in cases where the government is the plaintiff. The justices said trial judges could counteract both drawbacks.

Unanimously extended federal general assistance benefits to Indians living near reservations and maintaining ties with the Indian country.

The Bureau of Indian Affairs wanted the benefits reserved solely for reservation-dwelling Indians. The court held that Congress intended otherwise.

The benefits are approximately equivalent to state welfare benefits.

On Tuesday, the court refused to interfere with the state conviction of Arthur H. Bremer for the May 1972 shooting of Alabama Gov. George C. Wallace in Laurel, Md., during a stop in Wallace's presidential campaign.

Writing for the majority in the writ case, Justice Potter Stewart said that the government should investigate potential targets so that all may be named in warrants for wiretaps.

## \$2 million food plan under way

HILLSBOROUGH, Calif. (AP) — A massive volunteer effort to give away \$2 million in food got under way on Wednesday.

Patricia Hearst's birthday as the FBI agent handling the case predicted her kidnappers soon will free their young victim.

Charles A. Bates, agent in charge of the San Francisco office, said he had "a seat-of-the-pants feeling" that Miss Hearst would be released Wednesday. Nine days before, Bates predicted the Hearst family would hear from the kidnappers, and later the same day they did.

Patty Hearst turned 20 on Wednesday 16 days after she was abducted from her Berkeley apartment by two black and a white woman who lay down a barrage of gunfire behind them. The

Symbionese Liberation Army, a mysterious and militant radical group, has claimed Miss Hearst is being held as a "prisoner of war."

The new reorganization proposal was presented by Mark Alexander, ASBYU executive vice president. It outlines a system of government that would incorporate a Program Board and a Student Assembly under the executive branch of government.

Mark Alexander, vice president of Social Office, said "If we had a program board we wouldn't have a lot of the power we have now which is important having."

He said that in talking with University of Utah student officers who have a similar program he found that they don't have near the

responsibility that the Executive Council does now. As an example he pointed out that U. of U. student officers are controlled by the Special Events Center which works with promoters.

Reid Robinson, vice president of academics, said, "It would be very easy for the president to get people campaigning with the promise that they would receive a position." He pointed out that in this system, good representation would not occur, and there would be no student mandate over the heads of the board as they would be appointed.

The council voted to return to the other course of discussion that it had been pursuing after a motion by Mike Waddoups, vice president of finance. Six food in favor of the motion with Reynolds, Wilson, and Rector voting against the motion.

A proposal for the Office of Freshman Involvement was then discussed. Ron Richards, vice president of that office, presented a proposal that would have an appointed vice president in the spring and summer terms and would keep the elected official in the fall and winter.

"There would be many strengths of the office if it were improved to be a year-round program," he said.

Ex-ASBYU officers speak out about proposed reorganization

By MAX CROPPER University Staff Writer

Three ASBYU officers who served on last year's Executive Council say they do not favor reducing the number of offices in student body government.

All three, Jeff Boswell, Kathy Christensen and Des Wilson, are living in Provo but are not student body officers this year.

If some of the offices are eliminated from the Executive Council, there would be fewer voters deciding how to allocate \$250,000, said Jeff Boswell, last year's ASBYU executive vice president.

"The Executive Council's biggest job is the allocation of student funds," said Boswell in an interview. "But it's been considered very little in the talks about reorganization."

Boswell pointed out that most of the emphasis in reorganization considerations has been on the administrative role of the officers and not the legislative role.

The council has been talking mostly about the efficiency of the offices and their programs," said Boswell. "The other side of the coin is the legislative powers and allocation of money."

Kathy Christensen, last year's women's vice president, in interview said, "The legislative function of the council is very important. If there are more people to make the decisions, the decisions are more representative. I don't think there should be more officers, I think the number is about right now."

## Dayan 'no' end of line for Golda?

JERUSALEM (AP) — Prime Minister Golda Meir's chances of forming a new Israeli government were clouded Wednesday by Defense Minister Moshe Dayan's announcement that he would not join the new cabinet under present circumstances.

Mrs. Meir was reported near agreement with her Labor Alignment's traditional coalition partner, the National Religious Party. Then the one-eyed hero of the 1956 and 1967 wars against the Arabs announced he was holding out, presumably because of the widespread criticism of his failure to prepare the armed forces for the Arab attack in October.

"Dayan is trying to pull a Nasser," said one prominent political analyst referring to the late Egyptian President Gamal Abdel Nasser's resignation after Egypt's defeat in the 1967 war. Nasser's play brought hysterical mobs into the Cairo streets, shouting for his return to office, and he complied. But Dayan's plight has brought a similar reaction in Jerusalem, and it demanded his ouster.

Wednesday was the deadline for Mrs. Meir to form a new government or let someone else try. She could ask President Ephraim Katzir for a three-week extension, but it said Tuesday she did not intend to ask for more time.

the offices are needed if the individuals working in the offices were properly

Miss Christensen also expressed the opinion that all of the offices were properly

"In any office it's the officer that makes it effective. If the officer isn't effective, it's also because of the officer," she said.

Boswell added that there might be problems in the efficiency of some of the offices in the council, but suggested the problems be defined and solved within the offices and the council without eliminating offices or shifting responsibility.

"With fewer officers, there would be less representation of the council and freshmen would be more burdensome," he said.

Boswell also cited administrative advantages of the council. For example, he pointed out that the freshmen representative is needed because the freshmen don't get a voice in the election of the other members of the council. He also said the majority of the council members live off campus, while most freshmen live on campus.

Boswell said students living on campus and freshmen need representation, and the freshmen representative fills that need.

He said the Organizations Office was necessary "because it is a liaison between the clubs and the council."

According to Boswell, all of

Miss Christensen

Jeff Boswell

Miss Christensen said it was difficult to make decisions about allocations of large sums of money, and it would be more difficult with fewer voters.

Boswell commented "It's better to have a number of opinions when the amount of money being allocated is so large," Boswell said. "Before officers are eliminated, the council should carefully look at the legislative responsibilities of the council."

Des Wilson, last year's vice president of culture, said all of the offices play important roles, but if one of the offices were to be eliminated, the freshman office would be most

responsibility that the Executive Council does now. As an example he pointed out that U. of U. student officers are controlled by the Special Events Center which works with promoters.

Reid Robinson, vice president of academics, said, "It would be very easy for the president to get people campaigning with the promise that they would receive a position." He pointed out that in this system, good representation would not occur, and there would be no student mandate over the heads of the board as they would be appointed.

The council voted to return to the other course of discussion that it had been pursuing after a motion by Mike Waddoups, vice president of finance. Six food in favor of the motion with Reynolds, Wilson, and Rector voting against the motion.

A proposal for the Office of Freshman Involvement was then discussed. Ron Richards, vice president of that office, presented a proposal that would have an appointed vice president in the spring and summer terms and would keep the elected official in the fall and winter.

My, but you've changed, dear.

No shrieks, no screams. Only smiles as students catch sight of a mummy in Steven Walker's English class. At right, a closeup of the mummy, Bruce Midgley, sophomore, waiting for class to begin.

### Author's wife to leave Russia

MOSCOW (AP) — Alexander Solzhenitsyn's wife said today Soviet officials have told her she and her family can join the exiled writer abroad as soon as administrative procedures are completed.

The wife, Natalya, said the officials promised prompt action on passport requests for the family.

She said she was also told that "in principle" her husband's books and papers could be taken to him in the West. She said she was informed of this Monday at the passport office in Moscow.

Mrs. Solzhenitsyn said officials gave her documents to fill out. She said she had not started on them yet.

## Dean Cameron target in contest

By PAUL ROBERTS  
Universe Staff Writer

Dean of Student Life J. Elliott Cameron will be the target for the water balloon launching contest at noon today in the McKay quad as part of activities for Engineering Week.

The contest is sponsored by the American Society of Mechanical Engineers and will award cash prizes to the entrants whose balloons strike closest to the dean.

A lecture will also be held today at 10 a.m. in the de Jong Concert Hall. Dr. William Nordberg will speak on "Earth Observations from Space." Dr. Nordberg is the chief of the Laboratory for Meteorology and Earth Science of the NASA's Goddard Space Flight Center in Greenbelt, Md.

Electrical and civil engineering displays will be set up in the Reception Center of the Wilkinson Center from 10 a.m. to 2 p.m.

A tour of engineering displays will be given in an

open house from noon to 5 p.m. Friday and Saturday in the Engineering Sciences and Technology Building.

As another feature of Engineering Week, cars may be brought to the loading dock on the south side of the Engineering Sciences and Technology Building for free emission tests.

Today and Friday from 2 to 5 p.m. and Saturday from 8 a.m. to 5 p.m., engineering students will conduct the tests to compare the emissions of automobiles now in use with the standards set by the federal government for 1976.

Equipment for the tests has been obtained from the government and the automobile industry. A banquet will culminate Engineering Week Saturday at 6 p.m. in 394 ELWC. Dr. John Hale Gardner and Dr. Robert W. Bass, members of the Department of Physics and Astronomy, will discuss the Copernican theory, which may answer the problem of how to control thermonuclear fusion.

## Utah signs torn down under law

By CLAUDIA BATEY  
Universe Staff Writer

SALT LAKE CITY (AP) — The Utah Highway Department says more than 6,300 signs and billboards have been torn down along state highways since mid-1971 under the Federal Highway Beautification Act.

Don Staley, assistant chief of Right of Way Division, predicted Tuesday that it will take another nine months for the project to be completed.

But outdoor advertisers are accusing the state of foot-dragging in the federally funded program.

It calls for removal of signs company by company, rather than sign by sign. Outdoor advertisers receive compensation for any signs removed that were posted in areas the act says are illegal. About 3,744 signs have been taken down under this stipulation.

## Provo hires S.L. engineers to plan airport improvements

An engineering contract for about \$300,000 in improvements at the Provo airport has been awarded to the Provo City Commission by Salt Lake engineers Coon, King and Knowlton.

The Salt Lake engineers were chosen because of their past experience in airport design and FAA grant procedures, say city officials.

The following acceptance of the engineer's work by the Federal Aviation Administration, the city will make a formal application for the money which has been set aside for the airport project. Construction will follow the successful completion of these steps.

The airport project involves resurfacing runway 18-36, which runs from southwest to

northeast, and installing lights and a visual approach system.

The light system is to be a medium intensity installation to delineate the boundaries to the airport for approaching aircraft.

The visual approach system consists of visual approach slope indicators that are to be installed on both main runways. These indicator lights assist landing aircraft to approach the airport at the correct landing angle.

The lights are different colored and shine in a narrow beam toward the correct approach angle. If a pilot is too high, he sees colored lights which warn him to drop lower, if he is too low, the light system indicates his position.

If a pilot makes a correct approach he will see the appropriate color light for his entire descent.

The engineering firm will also be asked to prepare studies and reports on the

acquisition of clear space on the northeast end of the airport.

The Federal Aviation Administration required clear space acquisition as a condition of getting a grant to pay most of the cost of the airport improvements, according to Dave Gunn, assistant airport manager.

The federal grant will pay \$297,000 and the city and state will each pay \$14,800.

A large improvement involving the extension of runway 13-31 has created considerable interest in the community and especially among environmental groups who claim that the runway extension would eliminate valuable bird refuge areas south of the airport in the Provo Bay-Mud Lake area.

## Kissinger faces skirmishes in Latin American dialogues

MEXICO CITY (AP) — Diplomatic skirmishing over Communist Cuba faced Secretary of State Henry A. Kissinger Wednesday in his efforts to initiate a new dialogue between the United States and Latin America.

Argentina and Peru indicated shortly before Kissinger's arrival to meet with 24 Latin American and Caribbean foreign ministers that he would be confronted with Washington to ease its hostility

against the Fidel Castro regime.

But officials at the State Department have said that Kissinger has no intention of altering the 12-year economic blockade imposed against Cuba by the United States.

This major meeting of foreign ministers is in response to Washington's call for new and improved relations with its southern neighbors and allies, and they are flexing what muscles they have in an effort to deal with the United States on an equal basis.

## Four more announce candidacy

Four more candidates announced their candidacy for ASBYU student body offices Wednesday.

Those filing their candidacy petitions included Valerie Evelyn, Dala for women's vice president, Jon Gordon Fuller for athletics vice president, Jamie M. Johnson for academics vice president and Craig McManama for organizations vice president.

Students have until Friday at 5 p.m. to file petitions for the elected ASBYU offices.

## Average income declines

WASHINGTON (AP) — The Commerce Department says the personal income of Americans declined in January for the first time in 19 months. The drop was partially attributed to job layoffs stemming from the energy shortage.

However, the department also reported Tuesday that housing starts, another key measure of the economy's performance, increased in January after several months of steep decline.

Personal income declined \$4.1 billion in January to an annual rate of \$1,084.9 billion. During the previous month, the same income statistic had shown a rise of \$10.2 billion.

The January decline in personal income was the first since June, 1972, when it dropped \$700 million and the biggest since a \$1.1 billion decline in July, 1971.

The Commerce Department said the drop resulted from reduced employment and a short work week in commodity-producing industries, a decline in government subsidy payments to farmers and higher employee contributions for Social Security.

Manufacturing payrolls decreased \$3.5 billion, with the largest declines in the transportation equipment industry, including autos, the department said. The auto industry has been hit hard by the energy crisis, which has reduced demand for big cars.

### Handcart trek meeting planned

A meeting for all interested in a proposed BYU Handcart Trek will be held today at noon in the Varsity Theater.

The purpose of the meeting is to inform those interested in the trek and for the planning of committees. According to Brent Welder of the ASBYU president's office, the handcart trek is being undertaken to give the participants a better understanding of what the pioneers went through as well as provide an interesting activity for family groups or clubs.

### Political science professor to speak

Dr. Melvin P. Mabey, professor of history and political science, will speak on "The Persecution of Alexander Solzhenitsyn and Other Soviet Intellectuals" in a brown bag luncheon Friday at noon in 398 ELWC.

The luncheon is being sponsored by Pi Sigma Alpha, (the campus political science honor society). All political science majors and interested persons are invited to attend.

## At Allen's DUTCH AUCTION

Here's how it works:  
Beginning February 18, selected merchandise will be marked down every day until it is sold or until the sale is over. Prices for each day are marked in advance on a tag which is attached to the merchandise. You may buy the item for the price listed for that day or wait until the price goes lower. There will be rainchecks given, so you take the chance that the item you want will be sold while you wait for the price to drop. You may own an item for a specific day and if the merchandise has already been sold we will hold it for you until 5:30 of that day.

Some items are one-of-a-kind, so come in and look them over early.

Here's a small sample of the many items we will have for sale during our Dutch Auction:

# SBYU attorney general's jobs include prosecuting, investigating, writing briefs

By CLAUDIA BATEY  
Universe Staff Writer

Watson, ASBYU attorney general, is responsible for writing law, constitutions and informing the Executive of legal procedures.

Prosecuting students, running investigations and writing briefs are only a few of the duties performed by Derrin Watson, ASBYU attorney general.

Watson has many responsibilities acting as ASBYU attorney general. He stated, "I act as a legal counsel to the Executive Council, which includes writing of laws, constitutions, informing them of legal procedures, etc."

He went on to say, "I prosecute people, run investigations, write briefs, and take complaints."

He added, "The complaints come to me, not to the court itself, then I investigate and try to determine the legitimacy of the complaint, and try to determine if grounds for a trial exist."

He continued, "Then, comes the hardest part of my job—I try to decide whether I should prosecute or not."

He said if he decides to prosecute, he submits a brief to the court, then they decide whether or not to try the case. If they decide to try the case, Watson or one of his assistants conducts a prosecution.

If someone brings up a case against an ASBYU officer or officer and Watson feels the case is valid, he prosecutes the officer or officer. But if he feels that the case is invalid, he defends the officer or officer, said Watson.

Watson stated that he represents ASBYU before any ASBYU judicial body such as the Supreme Court, which handles appeals from lower courts and anything not delegated to a lower court, the Organizations Hearing Board, which handles club violations, the Elections Committee, which has original jurisdiction over election violations, and the Budget Committee which has original jurisdiction over financial violations.

Watson stated, "I'm the prosecuting attorney when any of these organizations meet."

About his other duties, Watson commented, "I'm responsible for the funds of all the courts," and "I am a coordinator and general executive for the courts."

He also said he renders initial interpretation of the law, which is subject to a reinterpretation by a court of competent jurisdiction.

He is also a member of the University Traffic and Safety Committee and works as a non-voting member of the Executive Council.

Watson became ASBYU Attorney General in an interesting manner. He stated, "I was a freshman and got on a constitution revision committee and Mark Reynolds, who was then the attorney general, was also on the committee. At one time, Mark came up to me and said, 'Brother, do you believe in callings?' I said, 'Yes,' and Mark said, 'Fine, Brother, you're called.' To what?" Mark said, "You are the new assistant ASBYU attorney general."

Watson said he served in that capacity until Reynolds ran for ASBYU president. Because of possible conflict of interest, Reynolds took leave of office and Watson became acting attorney general. When Reynolds won, Watson was the appointed attorney general and his appointment was ratified by the Executive Council.

He said he will be the

attorney general until this Spring term.

"Strange things" happen to Watson. "People come and advise me not to walk out on dark streets at night," he stated.

He said people come to him appealing a traffic ticket and say, "Why you can't give me a ticket for this—I've been doing this for three years and you haven't given me one yet."

Watson has two answers to this type of statement: "That's like going to your bishop and saying, 'You can't excommunicate me for adultery, I've been committing adultery every night for the past three years and you haven't excommunicated me yet' or 'Are you willing to swear to that?'"

"They say 'Yes,' and I say, 'OK, \$5 a day times five days a week times 32 weeks in a school year times three school years, that will be \$2,400,'" Watson recounted.

In this job, I get an amazing perspective about obeying and sustaining the laws of the land," stated Watson.

He continued, "I find when most Mormons say that, they don't cheat or kill or cheat too much on their income tax, but when it comes to getting behind the wheel of an automobile they look around and make sure there is no policeman and step on it, or check for a Security Guard and park in an A zone with a B sticker."

Thursday in 80 JKB at 10 a.m. Again! Lillian Hayes, of the Firebirds, will speak on Environment Action and Your Role as a Representative.

**GEOGRAPHY CLUB (GAMMA THETA UPSILON)**  
Thursday in 179 HGB at 10 a.m. A look at Rhodesia and a discussion with a resident of one of Africa's growing nations.

**JAPAN CLUB**  
Saturday in 184 JKB at 12:00 and 2 p.m. Zato ichi has brought mifune toshiro yojimbo with him!

**STUDENT DEVELOPMENT ASSN.**  
Sunday in the Little Theater 321 ELWC at 9 p.m. This is a Fireside with a spiritual theme. Our speaker will be T. Nelson. Refreshments will be served after the program.

**ARIZONA CLUB**  
Saturday in 134 RB at 8:30 a.m. Everybody come and enjoy the Arizona desert.

**BLUE KEY**  
Saturday at 7:30 p.m. in S.E. Gym of the Smith Center. Refreshments will be served.

**STUDENT EDUCATION ASSN.**  
Thursday in 261 MCB at 8 p.m. Dr. Harold Smith is showing his slides from England on the open road.

**Y SKI ASSN.**  
Thursday in 116 JKB at 7:30 p.m. We will be discussing the joys of the Targie trip.

**ALPHA ZETA**  
Wednesday, Feb. 27, in 361 MARB at 7:30 p.m. Dr. Smith will be the speaker.

**BYU FLYING CLUB**  
Thursday in 379 ELWC at 7 p.m. Voting on new members invited.

**SHOMRAH KIVEL**  
Thursday in 247 MARB at 7 p.m. European displays.

**UIA**  
Thursday in 545 ELWC at 4:10 p.m. To begin selection to be discussed in state meeting of UIA.

**WINDBREAKERS MOTORCYCLE CLUB**  
Thursday in 163 JKB at 7:30 p.m. Tour planning and all road riding, motor cyclists welcome.

**PHILIPPINE BAYANIHAN**  
Friday in 347 ELWC at 7:30 p.m. Winter Social. Full movie and light refreshments. Small admission charge.

**DELTA PHI KAPPA**  
Friday at 8:05 p.m. 620 N. at 7:30 p.m. Date party Friday at the House. Saturday 10 a.m. Service project. Meet at the house and wear grabbies. For all activities and pledges.

**SQUIRREL WATCHERS OF BYU**  
Monday at Ann's Tree House at 10 p.m. Bring all your squirrel on time! Don't forget Terri!

## Field class will offer six credits

Six credit hours can be earned by spending spring term in southern Utah at the annual Field School of Archaeology sponsored by the BYU Archaeology and Anthropology Department.

According to the Director of the school, Dr. Ray T. Matheny, 20 students will participate in the excavating, surveying and other archaeology projects undertaken in the Montezuma Canyon location.

Watson stated that these students enrolled will be required to enroll in Archaeology 455R for the six credit hours. Enrollment is by application form which may be obtained from the Department of Anthropology and Archaeology. It is not requisite that the persons be enrolled at BYU.

Students will live in tents. The camp is complete with electricity, refrigeration and plumbing.

Cost will be \$150 for tuition for LDS students and a \$150 sustenance fee. Tuition for non-LDS students is \$225. Deadline date is April 15. Notification of students accepted will begin May 1.

Population on the Mediterranean island of Corsica is decimated not by the bubonic veredetta and notorious bandits of its past, but by immigration, as several thousand young men leave every year to seek jobs on the continent.

## Experts on tapes queried

WASHINGTON (AP) — With encouragement from the White House, two challenges have emerged to a crucial finding of the technical experts examining the subpoenaed Watergate tapes.

One came from a volunteer, and the other from an unnamed expert consulted by James D. St. Clair, President Nixon's chief Watergate attorney.

Both were factors prompting U.S. District Judge John J. Sirica on Tuesday to order all sides in the tapes case to halt further public discussion of the matter.

At issue is the report of the six-member panel of experts on the 18½-minute gap in the tape of a June 20, 1972, conversation between the President and H. R. Haldeman.

The panel, chosen jointly by the White House and special prosecutor's office, and then appointed by Sirica, told the court it had determined that the Uher 5000 recorder on which Rose Mary Woods, the President's secretary, had listened to the June 20 tape, had been stopped and started manually at least five times during the 18½-minute segment.

The experts said they based their conclusion on the electronic marks made by the record and erase heads on the Uher machine. The marks, small parallel lines, are left on the tape when the record key pops up and sends a momentary pulse of electricity through the heads just before they are deactivated.

St. Clair questioned the experts about whether they were certain that deactivating the heads simply by pulling the plug out of the wall wouldn't leave the same marks. The experts conceded they hadn't done that but they said they were certain pulling the plug would not leave marks.

The experts also testified that they had found a defective part in the Uher 5000 recorder and replaced it. It was that action which was the basis of the most publicized challenge.

The challenge came from Allan D. Bell Jr., president of Dektor Counterintelligence and Security Inc., who appeared first on a Washington television interview program. He said he believed the defective part, which is linked to the power input on the machine, could have caused pulses that would have left the same marks the experts said were caused by pushing the buttons on the Uher.

Members of the White House staff suggested to reporters that they watch the show on which Bell was appearing.

More recently, when Bell's theory was discussed favorably in an article in Science Magazine, a publication of the American Association for the Advancement of Science, White House Press Secretary Ronald L. Ziegler told reporters they ought to read the article.

But Ziegler also told reporters at a briefing on Tuesday that Bell was not the expert St. Clair has cited in statements challenging the panel's finding. The White House has refused to name the experts.

Bell said in a telephone interview that his conclusions were drawn from an examination of the panel's report that he conceded that he had no access to either the tapes or the recorders turned over to the court-appointed group.

### Gas rationing doubtful

CINCINNATI, Ohio — President Nixon was quoted by Vice President Gerald R. Ford Wednesday as believing there is "little or no possibility of national gasoline rationing." Speaking with reporters as he flew here for a campaign appearance in behalf of Republican congressional candidate Willis Gradison Jr., Ford said Nixon told him at a White House meeting earlier in the day that "We could get over the hump — and I fully agreed with him."

### Health care controls sought

WASHINGTON — Declaring that "inflationary pressures are still strong in the medical field," President Nixon asked Congress Wednesday for authority to continue federal controls on health care costs.

In a special message, Nixon said he wants an extension of economic stabilization powers in the health area beyond their scheduled April 30 expiration. He said "We must maintain federal controls until other measures are adopted" under his pending national health insurance proposal.

### Cambodians battle rebels

PHNOM PENH, Cambodia (AP) — Government forces pressed a three-prong attack today against about 300 Khmer Rouge rebels northwest of Phnom Penh, field reports said.

A large armor-backed column met stiff resistance from a rear-guard element as it moved from the north, attempting to link up with two government brigades driving up from the south. The rebel pocket was reported about 10 miles from the capital.

### Russia test-fires new missile

WASHINGTON — Russia test fired a big new missile with multiple warheads into the Pacific on Tuesday, the Pentagon announced today.

This was the second round of new missile tests from within the Soviet Union in less than a month.

Russia said earlier this week that a series of such tests will be conducted until March 10.

### Stockmarket posts solid gain

NEW YORK — The stock market posted a substantial gain Wednesday with a boost from persistent optimism that the Arab oil embargo soon would be relaxed.

Brokers said the market also derived some technical strength from its firm performance in recent sessions in the face of gloomy news about inflation and far-reaching uncertainties in the energy and economic outlook.

### Four die in hijack attempt

SAIGON — A young South Vietnamese who tried to hijack a Vietnamese airliner to Hanoi killed himself and three passengers today when a grenade he was carrying exploded during a struggle aboard the plane, military officials said.

The grenade went off after the four-engine DC4 landed at Phu Bai, 65 miles below the border between North and South Vietnam. There were 46 passengers and a crew of six aboard the plane, and authorities said 15 persons were injured. The blast ripped two holes in the fuselage of the aircraft.

## Asia Colloquia lecture to view Japan economy

Students interested in the Japanese economy since World War II are invited to attend the Asian Colloquia lecture to be given today at 4:10 p.m. in 301 MSCB.

The lecture, "The U.S. role in Japan's economic resurgence," will be given by Dick K. Nanto, assistant professor of Economics.

According to Spencer

Palmer, chairman of the Asian Studies Department, the lecture will highlight several aspects of the Japanese economic recovery. "I feel this talk will be of general interest to a wide variety of people on campus," he said.

Nanto is presently in the Economics Department at the Y since obtaining his master's degree from Harvard last year.

## BYU gets Provo planning grant from new city library Exxon Co.

By KENT BIRCH  
Universe Staff Writer

Exxon Co. USA of Houston, Tex., has presented a \$4,000 grant to BYU to be divided equally between the College of Engineering Sciences and Technology and the College of Business.

Glen L. Palmer, employee relations coordinator at Exxon corporate headquarters in Houston and a BYU alumnus, presented the unrestricted grant Wednesday to BYU President Dallin H. Oaks.

The grant is from the Exxon USA Foundation, which has provided the university with financial donations for a number of years.

A BYU Economics 452 class will run a public opinion survey to determine the feelings of Provo residents about a new Public Library, according to Larry Horton, Provo Public Library director.

Horton said that the present library facility is far too small for the population and for the use that the library receives. He explained that the present library is sufficient for a population of 7,000, but not a population of 60,000.

The library was built in 1904 and remodeled in 1939. Horton explained this was the last major work done on it.

Horton also said plans for the new facility are not at all final. "The Provo City Library Board is considering possible solutions to the problem and trying to arrive at a reasonable estimate of the costs," he said.

The library board has also been considering the site for the building. Horton said that there would be a problem if the present building were not used since the property that it is built on was given by Jesse and Amanda Knight on the

condition that it would always be used for a library.

One possible solution is to have a branch library, according to Horton. This could possibly be constructed in the north or northeast part of town.

The block just west of the Provo City Center has also been suggested for a new library. Horton said that this proposal had lost most of its support however.

Horton stressed the fact that building costs are continually going up. The longer it takes to get the facility started the more it will cost.

A plan submitted by Horton called for a five year time schedule for building the library. According to the plan, the new library would be in use in 1978. Horton stressed that this is only a goal and dependent on many factors.

Horton also explained that when a definite plan is made then more definite costs can be determined and the proposal be made to the public for funding.

## Food controls not the solution, according to BYU professor

The American public must realize price controls are not the way to get more food on the table, according to Dr. G. Alvin Carpenter, professor of agricultural economics, who has made careful studies of the effects of prices and wages.

He feels that thought-makers and opinion-makers in this country must help increase "the economic literacy of the public" so they realize that price controls are not the answer to a greater food supply.

"Price controls on food have never worked and never will because they are not in accord with sound economics and the pricing system," Dr. Carpenter said. "Still, people continue to think if food prices were rolled back, they could eat more and better food and still have more money to spend for the other luxuries of life."

Dr. Carpenter opposes current consumer and bureaucratic pressures to institute more price controls. "We can't have more by

producing less," he said, pointing to the effects of price controls on meat products last summer. "Baby chicks were destroyed and whole poultry flocks were liquidated. In short, price controls did not have the desired effect of lowering food prices."

"Unless producers can get their costs of production plus a little profit, production does not come forth and shortages occur," he said. Shortages did occur in the meat areas, as well as other related areas. The slaughtering of dairy cows reduced the milk supply available. The slaughtering of hens represented dozens of eggs that would never go to market.

"If we want production to come to the market, we must let the free pricing system operate," Dr. Carpenter said. "Low consumer prices are not the key to improve better living. Production is the answer."

Dr. Carpenter used as an example the recent wheat shortages which he feels is on

its way to a solution due to lack of price ceilings on the product.

"Farmers have responded this year to higher prices," he said, "by planting 70 million acres of wheat—the biggest amount in years." He predicts the shortage will be eased by the estimated 2.1 billion bushel crop this year.

Dr. Carpenter pointed to the fact that even with increased prices, the U.S. incentive-oriented economy spends less than 16 per cent of its take-home pay on food.

"Thinking people must not let our pressure groups and politicians repeat the mistakes of imposing price ceilings in the food industry," he concluded.

### Have thumb, will travel

ORLANDO, Fla. (AP) — Elaine S. Camfield, at 72 a communications major at Florida Tech, has been getting to class the past two years by thumbing an eight-mile ride every day.

She never misses, says Mrs. Camfield. She stations herself at a busy intersection, flashes what she called her best "old lady's smile," then, "I walk up to a car and request a ride." Once, a driver held a gun on her while she made her request. He refused.

### Youth exploited

NEW YORK (AP) — The Rev. Morton Hill, president of Morality in Media, said Monday that organized crime is exploiting the nation's youth through pornography. "The mob has zeroed in on the most lucrative teen-age market in several decades," Hill told the organization's eight annual awards dinner, adding:

"Pornography is today's penny candy, tempting youthful minds with momentary thrills and choking them with raw filth that lies beneath the candy coating."

Morality in Media is an interfaith citizens' group formed to fight obscene literature and motion pictures.

## Statistics prof. to speak

Methods of designing scientific experiments will be the lecture topic on Thursday by Professor H.O. Hartley, director of the Institute of Statistics at Texas A and M.

Dr. Hartley will speak at 10 a.m. in 436 MARB. All students are invited to attend.

Dr. Hartley holds three separate doctorate degrees in the mathematical sciences, and has taught at the University of

London, Iowa State University and Harvard.

Despite his accomplished background, no math prerequisites are necessary to understand the Dr. Hartley's speech, according to a spokesman from the BYU statistics department.

The lecture will be the first lecture in the College of Physical and Mathematical Sciences' Colloquium Series.

## Up is down, down is up?

What goes up must come down—at least some of the time.

The elevator on the second floor of the Wilkinson Center is a case in point. When you punch the button to go up, and the door opens and you walk in—the elevator then goes down.

The same situation applies if you want to go down. If you punch the down button and get in, the elevator will go up. The solution to this problem is as follows: if you want to go up, push the down button, and get in. Then push the button of the floor you want, and it will usually go there. If you want to go down, simply reverse the process.

The problem originated with the attempt of workmen to fix the elevator. The button lights go on now, however, and the elevator doesn't get stuck between floors.

## TV schedules change by zone

By GRANT HANSEN  
Universe Staff Writer

If Johnny Carson comes on the television past your bedtime, blame it on the time zone.

All three network affiliated TV stations in Salt Lake City reschedule most network programs due to problems created by time zone differences and delays created by awaiting video tapes from their networks.

Scott Clawson, program director of KSL said that all programs are geared for the New York Time Zone with prime time from 7-11 p.m.

According to Lamar Smith, program director of KUTV, the networks like to have their programs broadcast from the stations at the same time as they are scheduled in New York City because they like their programs shown at times that correlate with programs on the other networks.

But local stations say they cannot fully comply.

"Some programs come to us at inconvenient times or times that are just not right for the viewing audience," said Clawson.

"The network is sometimes unhappy with the shuffling around of their programs, but it's our license, not theirs. If a station makes too many changes, however, it is possible that the network could take away their affiliation," Smith said.

KCPX generally delays its programs for one hour so as to correspond to the Chicago time zone while KSL reschedules many of its programs to later hours or other days. KUTV uses a mixture of the two methods.

Wini Done, Director of Public Services at KSL, explained that KSL's excessive rescheduling is created by a 7-day delay of video tapes from the network. "CBS approves of the program rescheduling," she said.

Don Rainger, program director for KCPX, said, "We structure our programming from 7-10 p.m. We always try to give the viewers the best shot at the prime time programs. It would be unfair to show them while people are eating."

According to Clawson, "All in the Family" and "MASH," which are scheduled for the 8 and 8:30 p.m. EST time slots on Saturdays, come to KSL two hours earlier. "This is a little too early for our viewers so we postpone them until Sunday at 8 and 8:30," Clawson said.

"Sometimes people get angry with us because we don't play network specials at the specific time announced by the networks. The CBS special 'The Migrants' was a case in point. It was scheduled and advertised by the network to appear in the 'Barnaby Jones' time slot at 7:30 p.m. EST on Sundays. We, however, were showing 'Barnaby Jones' at 10:40 p.m. on Saturdays, so there was no other alternative than to show it at that time," Clawson said.

"KCPX tries to use the network program sequence

wherever possible," commented Rainger. "Six Million Dollar Man" and "The Odd Couple" are the only programs which are out of sequence. They are moved to clear a slot for KCPX's "Friday Movie of the Week" which is shown from 7:30 to 9 p.m.

According to KUTV's Lamar Smith, "The Flip Wilson Show" is delayed from 6 to 7 p.m. and "Ironside" is delayed from 7 to 9 p.m. on Thursday evenings.

## Ombudsman

The office of the Ombudsman functions as a central clearing house to help students solve legal, consumer, and university related problems. For help come to 449 ELWC or call ext. 4132.

ISSUE: I sent my coat to the cleaners to be cleaned and they ruined it. Now the manager of the cleaners said he will reimburse me for half of what I paid for the coat. I think he should pay the full price. Do I have any legal recourse?  
ANSWER: In the event that your cleaner is to blame for the damage, you are entitled to recover the value of the garment's remaining life expectancy. According to the "National Fair Claims Guide for Consumer Textile Products" issued by the National Institute of Drycleaning, suits are expected to last two to four years, dresses one to five years, coats four years, and dress shirts two years. It is up to you to negotiate an adjustment with the cleaner which is based upon the original cost, the age and the condition of the garment.

ISSUE: I made a down payment on a deposit for a used car. I decided not to buy the car and went back to pick up my deposit, but the dealer had no record of my deposit and wouldn't give me my money back to me.  
ANSWER: The car dealer was contacted and he said he would be willing to return the money to the customer if he could present a receipt. The customer had no receipt proving he had put money down on the car but he did have a witness. We suggested he take his case to small claims court.

ISSUE: I bought a dress on sale at one of the University Mall stores. I decided I didn't want it but the store would not exchange it or give me a refund. I had not worn the dress. Is there some way for me to get my money back?

ANSWER: For some items or even for all items in some stores the policy may be "all sales are final." The store has every right to do this and will often have such a policy for goods which are on sale, sold at the end of a season or used as floor models. Before you buy you should check and see what the store's policy is concerning returns.

## Summer jobs open in Europe

Employment in Europe is available to interested students through the Student Overseas Services (SOS).

The SOS agency searches for and locates summer jobs for students interested in working in Switzerland, Austria, France and England.

Job openings available to students include restaurant and hotel work, factory jobs and resort employment.

SOS has also organized a number of bicycle trips through Europe. Students can sign up for both bicycle trips and a summer job.

Prescriptions from your eye physician (M.D.) or optometrist filled with precision accuracy

## Cougars to face battle Grand Canyon state

M DANGERFIELD  
Sports Editor

The conference winds to a halt and BYU to the warmer climate Grand Canyon State, the claws may not be as sharp when the Arizona Cougars play last night in their last meeting, ending to Coach Glenn the Cougars' play has much of cohesiveness the league leading clawed the hapless a heartbreaking 95-91 hurt loss on Jan. 25.

the game on that January night, Potter that can you do when rebound and outshoot from the floor and the still lose?

kids put out 100 per week long and we still can't ask the players out anymore than Potter continued.

that night in Provo, possible dark hour have been getting dark game there after.

Cougars still tremble when they hear the maelstrom after he unstoppable from on the floor with 44 in now leads the WAC with an average of 27.4 points and a total of 274 points and a 13th in the side of very opponent since began.

The Cougars switched their zone to a man in the last meeting, to try to the steady stream of points from the quick moving guard

Bob Elliott

Coniel Norman

Eric Money, would take over with easy crumples under the basket for 24 points.

If Money and Norman weren't enough, Bigman Bob Elliott is second in the WAC in rebounding with 117 on the season.

Now that BYU has a 4-6 record in conference play, the Cougars can only "be the

spoiler" as Potter put it. On the over hand Arizona has everything to win in these two home game titles this weekend including the WAC championship.

Last year, the Wildcats were in much the same position as this year, near the top. It was BYU that spoiled their chances for the conference trophy.

### ENGINEERING WEEK WATER BALLOON CONTEST

WEDSDAY, 12 NOON  
McKay Quad  
COLLEGE LECTURE  
J. W. NORBERG  
WEDSDAY 10 a.m.  
Concert Hall

#### Skiing Competition

"A good time was had by all. It was the best run meet we've ever had. We even started five minutes early and were done by 4:30."

That was the way John Murphy of the BYU Intramurals Office described the Annual BYU Intramural Ski Meet held Wednesday, Feb. 13, from 1:30 to 4:30 p.m. at Sundance.

Approximately 125 avid skiers participated in the Giant

Slalom, Rob Snow, who was the official starter of all the races noted: "It was the best organized meet we've ever had. We just shoved them through."

#### Intra-hoop

After four weeks of BYU intramural basketball there is still a healthy battle going on among the 419 teams scrapping for hardwood supremacy.

There is no change in the standings among the Church teams since they all got to rest last week.

The Top 10 of the Branch division shows 39C still on top of the heap with a spotless 4-0 record. 52A is a close second. 2A surged from tenth to the third spot. Since 86C was knocked off last week, 23A has moved in to fill the vacant number ten spot.

Among the Independents a giant fell last Saturday when Lady Smiles met with defeat. They were ranked fourth and had an average victory margin of 55 points prior to their stunning upset. This made room for TMF who tacked down the number ten spot.

## HEAPS HOOP HOPES OF PIZZA

150 EAST 800 NORTH

The Daily Universe board of prognosticators again invites BYU students, faculty, staff and wives to challenge its predictions on 15 college basketball games in the WAC around the country this weekend.

To enter the competition simply clip the following list of games, circle the team at left you think will win, write your name and telephone number at the top and take the clippings to the Daily Universe office, 518 H.W.C. before 5 p.m. today. Please predict the score of the BYU-Arizona game to be used in case of a tie. Submit only one entry per person.

The person with the best record each week will receive a combination dinner for two, compliments of Heaps of Pizza restaurant, plus live or live predictions for the following week, alongside those of the permanent board.

After 15th of two other winners with a 14-1 record, Lee long-a-runner from Blue Lake, Calif., predicted the score of the BYU-Utah game closer than his two rivals long won the basketball team.

## A's will get manager

OAKLAND (AP) — In the winter of their discontent, the Oakland Athletics will get a new manager today as Charles O. Finley attempts to tighten the bolts on a ship that has sailed to two World Series titles in a row.

With a wry smile on his face, Finley told newsmen two days ago they were "welcome to make any guesses you wish," and the guesses included Oakland coaches Irv Noren and Sherm Lollar, former A's Manager Alvin Dark, Montreal coach Dave Bristol and retired A's second baseman Dick Green.

Noren appeared to be the most likely candidate but one man close to the club said, "Nothing Charley could do would surprise me — not even if he named his mule the manager."

## ENGINEERS

In energy fields, communications, highway safety, consumer protection, exploring inner and outer space, defense, environment...Federal agencies have been given responsibility for some of the most important work being done today.

Some of their jobs are unique, with projects and facilities found nowhere else. All are challenging and offer excellent potential for advancement. Good people are in demand.

Our nationwide network can get your name referred to agencies in every part of the country. Chances are some of them are doing things you'd like to do.

## WRITE ON !

If you're aiming at an April graduation, extra credit, or a way to stay at home while you stay in school, you can draw a bead on your scholastic bullseye with a pen instead of a pop gun, through Home Study.

Home study offers nearly 400 university courses in 47 different fields. They carry the same credit as they do on campus, with no classes to attend, no schedules to squeeze into, no rigid assignment deadlines. You can start anytime and take as little as a few weeks—or up to one year—to finish. It's your time and your target. The pace is up to you.

So, pick up an enrollment form at Home Study, 210 HRCB, and WRITE ON IT! You won't be sorry.

## 210 HRCB home study

# Golden Richards to test sprints against pros in Salt Lake meet

Jim Ryun, shown here, ran against Kiphoge Keino in the 1972 Olympics in Munich and brought mile record back to the U.S. in 1966 after a three-year absence when he ran 3:51.3 at Berkeley. He lowered that to 3:51.1 the following year, which still stands as the record. In July of 1967, Ryun recorded world standard of 3:33.1 in 1,500 meters in Los Angeles. He has participated in three Olympics, and also holds the pro record for mile at 3:59.8, set last year in Detroit.

BYU's former football great, Golden Richards, will be on hand in the Salt Palace this Friday for the International Track Association's Pro Track Classic.

Richards, now the punt return specialist for the Dallas Cowboys, will run against the pros in a special Travelodge king-of-the-hill 40-yard dash. His opponents will be the "world's fastest man," Bob Hayes, and wide receiver-speeider Harol Jackson.

Because of the special interest created by this appearance of a BYU Alumni, BYU students (only) may obtain tickets for half price by presenting their activity cards at the Salt Palace ticket office. Tickets regularly sell for \$2, \$4, and \$6.

Other tracksters competing will be Jim Ryun, world record holder in the mile, shot put, Brian Oldfield, and last year's champion of the ITA is Ben Jipcho, unbeatable last year in the 3,000-meter steeplechase.

Newcomers to pro circuit this year include hurdler Ron Milburn and miler Ben Jipcho. Milburn set the world record last year as an amateur in the 120-yard high hurdles. Another spark for the ITA is Ben Jipcho, unbeatable last year in the 3,000-meter steeplechase.

Jipcho beat Jim Ryun last weekend in Baltimore in the mile and also won the two-mile run, establishing himself as the potential leading mile winner. With 18 meets remaining this year, Jipcho already has \$2,250.

Other highlights in Baltimore meet included Jim Green in the 300 at 32.6; Ron Jourdan, high jump 7.2; Jim Hines, long jump, 25-9/4; and Wymia Tyus Simberg at 6.6 in the 60-yard dash.

Greg Smith, former Big Sky pole vault champion from Idaho State University, joins world record pole vaulters Steve Smith and Bob Seagren, competing in this year's pole vault competition.

## Dinosaur discovery

# Album evokes country feeling

By CAROLYN GOATES  
Universe Reviewer

... he went up to the mountain found pages of the earth that were cryin' out to someone to read them to the world. One page told of beauty. Another told of strength; and he looked in fascination at one page told the story of giants in the land.

From "The Ballad of Dinosaur Jim"

"The Great Dinosaur Discovery" soundtrack album evokes a hopespun, antiquated country feeling through the utilization of banjo, guitar, piano, and melodia in its orchestration.

Written by BYU seniors Steve Amundsen and Dennis Lintone for the television documentary "The Great Dinosaur Discovery," this soundtrack has an airy, outdoorsy essence which gives it a flavor of adventure and discovery.

Largest dinosaur discovered The documentary centers around the discovery of the world's largest dinosaur skeleton by Dr. James A. Jensen, a BYU professor. When visiting friends in Delta, Colorado, Dr. Jensen found a

## The Great Dinosaur Discovery

"The Great Dinosaur Discovery" album is on sale in the bookstore.

dinosaur toebone in the home of two other dinosaur-bone enthusiasts, Eddie and Vivian Jones. He then planned an expedition to the area for more bone-hunting. He planned to stay six weeks, but due to the magnitude of his find, his expedition lasted much longer.

"The more he dug, the more he found," said John Linton, director of the film. After three months, Dr. Jensen had to leave his find and cover it for the winter because many of the ancient bones were intertwined and could not be removed intact, and also because of a lack of funds.

"The Great Dinosaur Discovery," now available in the Bookstore, tells of Dr.

Jensen's finding his dream of discovering the world's largest dinosaur, and then having to leave it behind.

Film about people "This is not a film about bones, it is about the people who look for bones," said Linton.

Dr. Jensen is portrayed throughout the soundtrack by the banjo. Through variety in scoring, moods ranging from exhilaration to despondency are evoked as in the two selections, "The World Spreads," and "Bonehole Blues."

"Travin' Tune" which is the background for Dr. Jensen's first view of the quarry area, simulates the open feel of the West through a bagpipe-like-

electric organ arrangement, a vibrant string sequence, and countryish banjo sections. Guitar and melodia are used to reinforce the mood of exhilaration in "Three-Ton Extraction," where Dr. Jensen lifts the dinosaur's three-ton pelvis into the air with the Colorado sunset for a background.

Instruments portray men "Working the Bonehole" which is a montage of men working in the quarry, effectively combines guitar and banjo with other instruments to create a bustling, invigorating essence. "The Funky Clunker" is the background for a scene which Steve Amundsen describes as "A bunch of Okeys driving into the quarry in an old beat-up car." A note of whimsy "ias" added to this song through the use of a verbal "chugging" sound, and the intersection of a Jew's harp at regular intervals.

The final song "Dreams" tells of Dr. Jensen finding his dream and "winning yet losing." Its rock tendencies in guitar and drum orchestration add to and heighten, rather than detract from the informal, country atmosphere of the rest of the soundtrack. This song was chosen "Pick Hit of the Week" by a local radio station.

Technical problems It is evident that some technical problems occurred during the recording of "The Great Dinosaur Discovery." Mixing and balance problems are apparent in several sections. It is difficult to believe that the extremely articulate yet delicate voice in the narration of "Ballad of Dinosaur Jim" is that of a rugged dinosaur hunter. Originally, the "Ballad of Calico" by Kenny Rogers and the First Edition accompanied the film, and the composers were hired solely to write the first song. However, Linton said that after hearing the first song with the film, he felt that original music would best fit the film.

Amundsen explained some technical problems arose because of the necessity of scoring the soundtrack to the film after it was made. He said this created some timing discrepancies because of a lack of proper equipment for this type of synchronization at the BYU recording studio.

## Newly discovered concert performed

NEW HAVEN (AP) — The Yale Symphony Orchestra presented the world premiere of the recently discovered full orchestral version of "Three Places in New England" in February. The concert was in commemoration of the centennial of the birth of the composer, Charles Ives.

Goddard Lieberman, president of Columbia Records. Ives gave Lieberman music, most of it photostats, and he was unaware he had the original manuscript. He has donated it to the Yale Library where Miss Perlis is assistant curator. The library has photostats of the remainder of the work.

Ives had reduced the orchestration of the work for its first performance, by the Boston Chamber Orchestra in 1931.

## Crazy TV games gist of new book

By JAY SHARBUITT  
AP Television Writer

NEW YORK (AP) — Even though he gave television "The Dating Game" nine years ago, Chuck Barris isn't all bad. For one thing, he doesn't wear ties, which in my book automatically makes him a good citizen.

For another, he's working on his second novel, "The Game Show," in which he says the hero, a TV game-show packager, finds "a good way to boost his ratings by killing contestants on the air."

Some might say this is what eventually happens to the mind of a 44-year-old Philadelphia I have reference to Barris — who is one of Hollywood's most successful developers of TV game shows.

But he just grins and denies it. "I'm just trying to write a book of the absurd with television in mind," he says, adding that he's not out to commit an expose of the game-show business or anything like that.

## Handel Society features box office stars to solo

NEW YORK (AP) — For the first time in its history, the Handel Society is featuring box-office stars as soloists in its Carnegie Hall subscription series, its fifth.

tenors Richard Tucker and Richard Lewis are among the soloists.

The society also is departing from its policy thus far of devoting an entire evening to the Handel work.

U.S. ARMY ROTC—THE MORE YOU LOOK AT IT THE BETTER IT LOOKS

On Peregrine falcons

# First research done

By BECKY STALLINGS  
Universe Staff Writer

Covered wagons and whooping Indians aren't always necessary for pioneering.

In this case, there were only two men with backpacks, 1,500 to 2,000 miles from civilization on Greenland's icy tundra. There they conducted the first in-depth research ever done on peregrine falcons in Greenland.

Initiated first study

"Until we initiated our first study in 1972, nothing was really known about the peregrines in Greenland," said Bill Burnham, a graduate student at BYU. His co-researcher was Dave Clement, Dartmouth College.

"The number of peregrines are declining all over the world, but no one knew what their status was in Greenland. We went to find out and to establish a data base," said Burnham.

"I feel we accomplished a lot," he added.

The project was organized by Dr. William Mattox, employee of the Ohio Department of Natural Resources.

In the summer of 1973 (May through July), a second expedition was launched. This time Burnham was accompanied by Alan Jenkins, another graduate student from BYU, whose contribution was a time-lapse, photographic study of Greenland's gyrfalcons.

The 1973 research began at the University Zoological Museum, Copenhagen, Denmark, where Burnham and Jenkins examined a peregrine falcon skin collection compiled by Dr. Finn Salomonson, who later helped them get authorization for their work in Greenland.

They landed one week later on the west coast of Greenland

at a U.S. Air Force base.

Soon after, Clement joined them and, after helping Jenkins get set up, he and Burnham hiked further into the tundra to establish their base camp.

Burnham and Clement backpacked from 1,500 to 2,000 miles during the two summers and were often away from their base camp for 10 to 14 days at a time.

As they walked, they searched for peregrine nests, located on an average of one bird per 100 square miles.

They collected data on nesting requirements and species and density of the small birds eaten by peregrines.

## Important concern

Another important concern of the men was the pesticide level in the birds, the main causative of eggshell thinning and the premature breakage of eggs, according to Burnham.

"Even though peregrines in Greenland have rather high DDT levels, the situation is not overly critical," said Burnham. "They are maintaining a rather stable population. Each nest is putting into the wild an average of 2.2 young per year—a pretty good comparison with some other populations."

He believes the birds pick up most of the pesticides in South America during their winter migration there. The small birds that flock to Greenland and are eaten by the peregrines also contribute to this, he added.

"Because the peregrine is an endangered species, we don't pick up viable eggs," Burnham explained. "We gathered only two eggs in 1972 and one last summer, but we were able to get a pretty good idea of the situation just from those."

Eggshells were examined and a comparison of shell thickness

made to those of the pre-DDT era (1940s) to see if there was an increase in the birds' pesticide level, said Burnham.

"There was," he reported, explaining that his research showed a 14 per cent thinning in the shells.

Young falcons were banded to indicate their migratory habits and life span. If the birds are killed or captured, their band number will be reported to the Greenland government, according to Jenkins. None have been reported of the 37 peregrines banded in 1972-73 and the 12 gyrfalcons banded in 1973, he said.

During his study of gyrfalcons, Alan Jenkins maintained a permanent base.

## Not enough personnel

"We didn't have enough personnel to accomplish what we had to without Alan working alone," explained Burnham. "I tried to check on him every two weeks, though, to make sure he was okay."

Once a week Jenkins would hike back to the Air Force base for supplies, a five-hour trek. As he walked, he counted the small birds, measuring each population strip into 1,000 paces, 50 feet on either side.

During the three months of his time-lapse, photographic study of nesting behaviors of gyrfalcons, he compiled over 600 slides, 12 rolls of black and white film, 26 rolls of time-lapse film and 10 rolls of regular movie film, totaling over 76,000 frames for future data compilation.

"I was looking for a number of things," he said. "Because Greenland has 24 hours of daylight, I was interested in finding out how many hours the birds are awake, how often they feed their young and how long they brood their young (cover them to keep them warm)."

"So far I've found nothing unique about these birds compared to those of the Western areas," he added.

The nests of both the peregrine and gyrfalcons are nearly all located on cliffs, so a great deal of rappelling was necessary for both parties, according to Burnham.

Most of the cliffs were about 100 feet high, said Jenkins, but he did find one on which he ran out of rope before reaching the bottom that he estimated to be twice that height.

Whenever possible, Burnham indicated that he would climb up from the bottom with nuts and pins rather than rappel down.

## Continual daylight

Because Greenland is located just above the Arctic Circle, the summers are characterized by continual daylight.

"You could get up in the middle of the night without even getting sleepy," said Jenkins. "I could take photographs at 3 or 4 a.m. or read in my tent without a light."

The weather fluctuated between a high in the mid-60s and a low in the 40s, he added.

"Your metabolism gets all stoked up from it," he said. "You'd go out in the sun without a coat and if you did any work at all you'd break out in a sweat. When I came back in August, Provo was unbearably hot."

The people of Greenland were "unique," according to Burnham, with a happy attitude and friendly disposition. He noted that because most Greenlanders didn't speak English, he often drew pictures to communicate.

Most of the work was done inland on the western side of Greenland, according to Burnham.

He and Clement spent two weeks on the East coast of the island collecting information on the peregrines there.

"It was an exploratory thing to see if it was feasible to go back again," he said. "The peregrines there are fewer in number and more widely scattered."

"The East is more rugged," he said. "Men carry guns because of polar bears. You don't see much European influence. It wasn't until the 1800s that human life was even discovered on that side of the island."

## Camera malfunction

A camera malfunction was Jenkins' only real problem all summer, when a camera motor broke, necessitating the substitution of two motorcycle batteries, 10 pounds each, as an energy source.

"I had to carry them around to run the camera. They got awfully heavy," he said. "Finally they broke when they dropped as I was lowering them down a cliff."

The rivers made swift by summer ice run-off and the

These two male gyrfalcons on the nest were banded by Alan Jenkins during his time-lapse, photographic study of gyrfalcon Greenland. A total of 12 gyrfalcons and 37 peregrine falcons have been banded.

quicksand bounding them posed problems for Burnham and Clement. Burnham admitted being pulled into both several times.

He also indicated that the loneliness of the area could be dangerous.

"As soon as you go any distance from a town, you can run into trouble," he said. "All the people are clustered together so if you walk a couple of miles and break a leg, you'll probably die because no one would find you."

A summary of both years' study will appear in the March issue of "Arctic." Burnham plans to publish his masters thesis on peregrine falcons as does Jenkins, on gyrfalcons.

## Proxy elk appears

LEWISTON, Idaho (AP) — Appearing at a hearing to support classification of 1.5 million acres of central Idaho as a permanent wilderness, school teacher Virginia Wright took the stand wearing a pair of spreading antlers.

The sign dangling from her neck read "Elk," and when she finished testifying, she blew an elk call.

The elk couldn't appear at the hearing, she explained, so she was testifying for him.

# CHIAM CAFE

## FOOD TO TAKE OUT

The newest and Finest Chinese and American Cafe in Utah County

1620 S. State - Orem

225-8022

Open Daily 11:30 a.m. to 11:00 p.m.

Fri. & Sat. 11:30 a.m. to 2:00 a.m.

Bill Burnham camps by an Arctic Lake during his summer-stay in Greenland. His work there constituted the first in-depth research on peregrine falcons in Greenland.

## Orchards, auto care classes set

Care of Home Orchards, Gardens and Lawns and Auto Maintenance for Men are two new classes being offered.

Special Courses and Conferences, according to Gary R. Bascom, program administrator.

Care of Home Orchards, Gardens and Lawns is an eight-week course emphasizing the fundamentals of preparation of soil, choice of varieties, pest control and cultural practices. Opportunity will be given to practice techniques used in budding, grafting and growing transplants in the greenhouse. The course begins Feb. 21 and is held Thursdays at 7 p.m., Bascom said.

Auto Maintenance for Men is a six-week course providing instruction and experience in the basic principles of automotive maintenance. Bascom said that the class will start March 6 and will be held at 7:30 p.m.

Additional information can be obtained by contacting Special Courses and Conferences in 242 HRCB, he said.

## Psychodrama, lecture subject

"Group Techniques as Related to Psychodrama" will be the topic of Joel Millard, assistant professor at the University of Utah, in a speech at JKB 25, tonight at 7 p.m.

Millard will be the guest speaker for the Social Work Club and anyone else interested in attending the meeting, according to Glen Ames, student representative of the club.

Memberships and activities of the club will be discussed during the meeting.

Don Langford will also be in attendance to tell about membership in the National Association for Social Workers.

## German club schedules fest

The German Student Circle Club "Deutsche Studenten Kreis" will sponsor "Fasching," a German celebration, tonight with a parade starting at the McKay

Building.

According to Deanna Zivkovic, vice president of the German Club, the parade will start at 6:11 p.m. because 11 is a fool's number.

The parade will be led around the campus by a prince and a princess and costumed members will toss candy to spectators.
